Additional Information:

Complete the following information if Method 5035 for VOA soils has been requested:

	# of low conc. soils	# of medium conc. soils		Type of Vials	# of low conc. sediments	# of medium conc. sediments
	107 (Encore)			4oz Amber Jar	33	

3. CLP Modified Analysis Clause - The latest Statement of Works (SOWs), includes a modified analysis clause. The modified analysis allows the regions to request minor changes to current SOW analytical methods in order to meet specific field site requirements. The changes are limited in scope and must be approved by the EPA CLP Program Manager and Contracting Officer before implementation. Information must be submitted **three weeks** prior to the sampling event. The information the client must submit three weeks prior to the sampling event are; Lab Request Form and the approved sampling plan/QAPP.
4. Analytical results required (specify laboratory documentation and reporting requirements, reporting units, format requirements, etc.): (QA/R5 - Elements A6 and B4) CLP analyses or EPA Houston laboratory: Full data packages and EDDs according to protocols. PDF file is requested.
5. Data requirements (reporting limits; per analyte per matrix; reporting units; applicable reference levels, etc.): (QA/R5 - Elements A7, B1, and B4) (Attach extra pages if necessary) For CLP capabilities - <http://www.epa.gov/superfund/programs/clp/facts.htm> For Region 6 Laboratory capabilities - <http://www.epa.gov/earth1r6/6lab/r6lab.htm>

Note: Samples submitted to the CLP for analysis must be low or medium concentration, single phase, homogenous (not oily), soil, sediment, or water. Also, samples with matrix related problems (oily material, high concentration of compounds, etc.) and/or high moisture content will raise the method CRQL's.

- a. Compounds/chemicals of concern (Action levels etc.) – **Required information – List the compounds/analytes driving the investigation and the action level required to meet**

**DQO's.**

Parameters	Action Levels / Detection Limits	
	water (µg/L)	soil (mg/kg)
Chemicals of concern have not been designated yet. Action levels required to meet DQOs for all analytes being analyzed for are presented in Appendix A of the QAPP Addendum.		

## 6. QC Requirements (PE samples &amp; frequency, spikes, duplicates, blanks, &amp; frequency)

QC Type	Frequency	QC Limits
MS/MD	1 per 20	
MS/MSD	1 per 20	

## 7. Data Review Options (For CLP generated data only)

Data review options apply only to data acquired through the CLP. See Attachment 5 (Region 6 Organic/Inorganic Data Review Options).

Data turnaround times refer to calendar days.

Mark the level of data assessment needed:

- ☒ Level 2 – Region 6 Standard (7 day turnaround)\*  
☐ Level 1 – Modified CADRE (3 day turnaround)\*

**\* Plus 1 - 5 days for processing and mailing.**
